

**SOLENT STEVEDORES**

## **ENVIRONMENTAL POLICY STATEMENT**

As a long established provider of ports services, Solent Stevedores is committed to effective environmental management.

To this end we have established and will maintain an environmental management system which complies with ISO 14001:2004 and have this certificated by a UKAS- accredited certification body.

The scope of certification is:

**“Provision of cargo handling and storage, including the loading and unloading of bulk carriers, general cargo vessels and cruise ships”.**

Our three key commitments are:

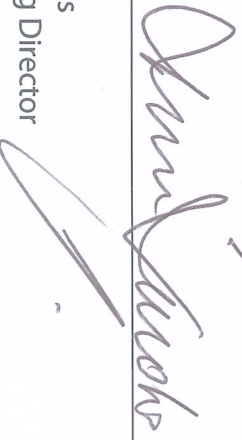

- To continually improve our environmental performance using objectives, targets and action plans.
- To comply with all applicable legal requirements and other requirements to which we subscribe.
- To prevent pollution by careful management of chemicals, energy and waste.

Our most significant environmental issues are:

- management and reduction of waste,
- maximising recycling,
- minimising energy use in offices and vehicles
- Management of potential nuisance issues relating to storage of materials.

All employees and those working on behalf of Solent Stevedores are briefed on this policy and our key objectives as well as any other procedures in our environmental management system which impact upon their work.
